

Vaughn Interior Concepts

Vaughn Interior Concepts is a Dayton-based company committed to making a difference through quality and sustainability. The maker of custom commercial and residential interior solutions uses green materials and processes to build cabinetry, reception counters, wall paneling and more (with the only fully automated wall panel line in the country). The

core materials used in many of Vaughn's products are 75 percent post-consumer recycled, with urea-free glues. Vaughn is working toward being a 100 percent landfill-free manufacturer and is investing extensively in green building

improvements at its new headquarters and production building at 140 N. Keowee St. Green enhancements include energy-saving lighting, roofing and insulation. The City of Dayton is supporting the expansion with an \$80,000 sustainability grant from its Energy Efficiency fund. Vaughn is DRG3-certified, signifying leadership in using green business practices.
